DETAILED ACTION

Reasons For Allowance

1. Claims 1-74, and 77-84 are allowed.
2. The following is an Examiner's statement of reasons for allowance:
3. The cited prior art taken alone or in combination fails to teach the claimed invention of an acoustic signal analyzer, as claimed by Applicant. Specifically, independent claims 1, 37-38, 74, 77, 79, and 80-83 disclose an acoustic processing system that:
 - a. receives a set of acoustic signals;
 - b. stores a function that gives a probability density function (PDF) for a particular set of signal values;
 - c. applies the set of signal values to the stored function to derive samples of parameter values from the PDF;
 - d. processes the PDF to derive samples of parameter values from the PDF;
and
 - e. analyses the derived samples to determine parameter values that are representative of the acoustic signals.

4. The closest prior art of Malinverno et al.¹ teaches an acoustic processing system that:

- a. receives a set of acoustic signals;
- b. stores a function that gives a probability density function (PDF) for a particular set of signal values;
- c. applies the set of signal values to the stored function to derive samples of parameter values from the PDF; and
- d. processes the PDF to derive samples of parameter values from the PDF.

but fails to teach or suggest:

- e. analyses the derived samples to determine parameter values that are representative of the acoustic signals.

To the extent that this feature is not present in the prior art cited by Examiner, the present case is held allowable over the art of record.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
